

PLEXIS PAYER PLATFORMS

THE ROAD TO BETTER BUSINESS

BEGINS HERE

Three essential components of the PLEXIS payer platforms

PLEXIS designed its platforms with three primary components that offer the power, flexibility, functionality and connectivity for today's leading healthcare payers

1 Mission-critical core administration and processing engines

Process claims in a timely and accurate manner, and automate the complexities of benefit administration to capture a quick ROI and deliver superior customer service

2 Integrated business applications

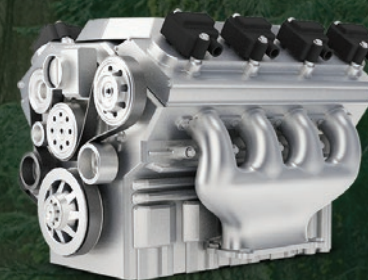

From real-time benefit administration and adjudication to automatic EDI transmission and self-service customer portals, PLEXIS Business Apps have you covered.

3 Passport connectivity services

Passport is sophisticated plumbing, connecting disparate systems throughout your business ecosystem with real-time or batch integrations with PLEXIS' platform.

Start Your Payer Engines with PLEXIS

Empower your business of healthcare with the proven performance of PLEXIS' trusted core administration and claims management engines

PLEXIS architects designed our core administration and claims management engines with the flexibility, scalability, and agility to solve payer-specific challenges. PLEXIS technology features rules-based, cutting-edge performance with advanced, multi-level security.

Ignite growth and efficiencies

Built on world-class architecture, PLEXIS' core administrative engines are flexible, connected, and scalable. Each platform provides complete benefit administration, claim processing, premium billing, capitation, authorization, reporting features, and more.

PLEXIS' essential core administration and claims management engines drive higher rates of auto-adjudication, empowering the business of healthcare across multiple lines of business.

Your essential core administration and claims management engines

PLEXIS empowers domestic and international payer success through the solid technological foundation of our SQL-based platforms. Seamless, Out of the Box Business Apps

Your business toolkit, reimagined

PLEXIS' suite of best-in-class business apps has a proven record of giving payers the extended functionality necessary for modern core administrative ecosystems.

From real-time benefit administration and adjudication to automatic EDI transmission and self-service customer portals, PLEXIS Business Apps have you covered.

PLEXIS business apps are readily configured to serve a variety of crucial business functions. Tied into the power of PLEXIS' core administration and claims management engines, our business apps give your organization the tools needed to grow and operate your business efficiently.

PORTALS

Extend your business through real-time connectivity and enhanced communication

OPTIMIZATION

Batch readjudication + automated business activity monitoring with flexible, intelligent alerts

EDI

Automated, customizable EDI apps reduce administrative costs and simplify data conversion

CARE MANAGEMENT

Manage care plans, assessments, correspondence, authorizations and referrals

BI/BA

Comprehensive, real-time results and actionable insights through flexible alerts and reports

CUSTOMER SERVICE

Automated routine workflows, call tracking, and Microsoft CRM integrations

SALES + MARKETING

Integrate Microsoft CRM functions to drive sales, capture new prospects, and build relationships

CLAIMS EDITING

Seamless solution accelerates claim adjudication and increases payment integrity

PROSPECTIVE PRICING

Simplify APC, DRG, and ASC pricing by embedding it within PLEXIS' core platform adjudication process

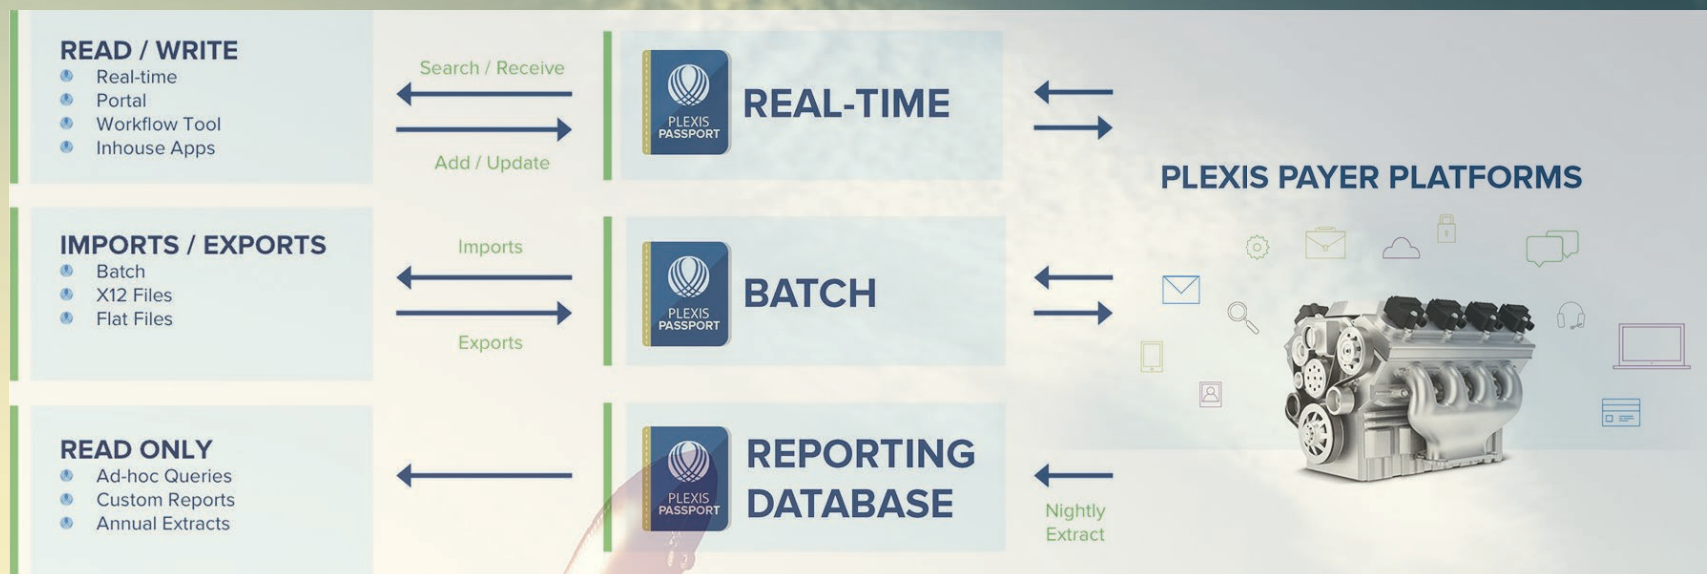

Your Passport to a More Connected Business

Passport is PLEXIS' suite of application interface services that create enterprise interoperability, connecting disparate systems through real-time or batch integrations with PLEXIS' platform. With the power of PASSPORT, organizations gain total control over their business ecosystem.

As modern business ecosystems grow in scale and diversity, CIOs are increasingly faced with the

challenge of solving interface connectivity issues. The strategic agility of PLEXIS' Passport empowers payers to automate workflows and orchestrate diverse system architecture, breaking down data silos.

Representing one of PLEXIS' most powerful integrations of a product and service, Passport provides real-time or batch integration with PLEXIS' platforms. The Passport connectivity layer can be leveraged in a limitless variety of configurations as workflow tools, PLEXIS app integrations, client's in-house app integrations, custom app integrations, or for standard EDI/X12 processing.

Who is PLEXIS?

Since 1996, PLEXIS has provided enterprise software and services that process millions of claims transactions daily for diversified organizations throughout the United States and the larger global insurance community.
